## Update Application

1. TEAM

2. STARTUP DETAILS

3. ADDITIONAL INFORMATION

# Team

We back exceptional founders. Tell us who's building this and why you're the team to make it happen.

Required fields are marked with an asterisk (\*).

### Are you full-time or part-time on the startup? \*

 Full-time Part-time

### Number of Full-Time Founders \*

How many founders are working full-time on your startup?

 0 1 2 3 4 5

Founders are individuals with over 10% equity. If you're part-time or not yet incorporated, enter '0' and add all co-founders in the section below.

### Total FTE Employees \*

How many full-time equivalent employees (including founders) are currently at your startup?

FULL-TIME EQUIVALENT (FTE) \*

4

Part-time staff should be counted proportionally (e.g., two half-time employees = 1 FTE).

### Founder Details \*

Tell us who's building this. Start with the CEO, then add any co-founders.

## Relevant experience \*

In a few sentences, highlight your most relevant professional, startup, or industry experience. Focus on track record, domain expertise, and past wins.

FOUNDER EXPERIENCE \*

20+ years building and operating. Bootstrapped UVO Group EdTech to \$60M+ cumulative profit, 350 staff and 1,000–3,500 contractors. Co-founder of Integrito — \$1M ARR, 36% YoY, 342 institutions, raising \$2.3M SAFE at \$20.5M pre. Active GoMining player: 67,000 TH/s, farm #15 globally; holder of the platform's #1 individual NFT — top by TH (6,000+) and rarity, on-chain verifiable. Built proprietary quant libraries (kNN, Mahalanobis, transfer entropy, regime detection) to hedge that farm

## FOUNDER EXPERIENCE \*

Mining engineer (Donetsk Polytechnic, 1990) and PhD in Engineering Sciences (1999, mineral-deposit development technology). Chairman of the Board and majority shareholder of Coal Energy S.A. (Warsaw Stock Exchange, ticker CLE PW since August 2011; peak market cap \$320M; pre-war workforce ~5,000). 2002–2014, Donbass: restored 10 coal mines from previously closed state assets, launched a coal preparation plant, processed 10 million tonnes of anthracite-bearing waste rock.

### Tell us more about the team \*

How does the team know each other? Is there anyone else on the team? Why is this the best team to win? Do you have any key advisors? Etc

TEAM DESCRIPTION \*

Yevgen and Victor both relocated from Ukraine to Cyprus, where they met. Complementary moats: Yevgen owns the Web3-product and demand side as GoMining's #1 NFT miner building its successor; Victor owns the asset side as Chairman of a WSE-listed mining company. Ore came out of Yevgen's exhaustion defending a crypto portfolio against algo-driven liquidity hunts and news shocks, plus a flat GoMining game curve, meeting Victor's "tokenize a couple of my mines".

# Startup Details

Help us understand your startup. The problem you're solving, your solution, and where you are today.

Required fields are marked with an asterisk (\*).

**Startup Name \***

STARTUP NAME \*

ORE

**Pitch your startup in one sentence. \***

What do you do and for whom? E.g. "AI-powered therapist for Gen Z"

ONE-LINER \*

Web3 mining game backed by real, licensed metal tailings

9/10 words

**Startup Description \***

What problem are you solving? What are you building?

STARTUP DESCRIPTION \*

Ore is a Web3 mining game. The mining is the entertainment; the yield is what the deposit gives back. Each in-game miner is collateralized by a share in licensed metal tailings, not synthetic scarcity. The reference comp is GoMining — 4.5M users, deterministic yield, low retention past onboarding. Ore replaces that determinism with geologically stochastic yield inside known bounds: 25–60% polymetallic gold, 35–75% Romanian gold-anchored tailings, 25–45% Mongolian brown coal. Coal
